Winter Meeting

Nov. 29th-Dec. 1st, 2023

BARCELONA - SPAIN

WELCOME

Dear friends and colleagues,

We would like to invite you to the 2023 EpSSG Winter Meeting, which will be held in Barcelona from November 29th to December 1st 2023. It's a great pleasure to welcome you all in our beautiful and friendly city. The meeting will be a great opportunity to work on future and ongoing clinical trials and projects, enjoy interaction with clinicians and scientists working in the field, engage with young investigators, interact with parents and patients' advocates, and discuss the future strategy of our association. But also, to enjoy a wonderful stay in our city.

Barcelona, the cosmopolitan capital of Catalonia in Spain, is well known for its art, architecture and food. We hope you will be able to enjoy the city's numerous tourist attractions and we are sure that you will enjoy discovering local gastronomy in the city's breadth of local and international restaurants.

Our meeting will be held in two different campus. On November 29th, the different subcommittees meetings will be held at the Vall d'Hebron Hospital Campus, a highly specialized comprehensive cancer center, with national designation as reference centre for both pediatric and adult sarcomas by the Ministry of Health and part of ERNs PaedCan and EURACAN. It is the largest hospital complex in Catalonia and one of the largest in Spain, offering highly specialized healthcare both for children and adults.

On November 30th and December 1st, the main meeting will take place at the Poble Nou Campus of the Pompeu Fabra University (UPF). The origin of the building was a textile factory, which began operating in 1877 and closed in 1986. With the refurbishment of the complex, the UPF has succeeded in reclaiming this magnificent example of Catalan industrial heritage.

We look forward to meeting you.

Yours sincerely

Lucas Moreno, Gabriela Guillén, Raquel Hladun and Josep Roma, on behalf of EpSSG and the Organising Committee
